**Аутори:** др Божидар Манић, др Наташа Чолић, др Ана Никовић, Борјан Бранков  
**Институција:** Институт за архитектуру и урбанизам Србије

CLEVER је припремни пројекат у оквиру Interreg програма, који је у току 2018/19 развијен кроз сарадњу Румуније, Србије и Хрватске. Главни циљ пројекта је развијање иновативних модела управљања и регенерације јавних простора кроз примену нових технологија. Остварени резултат пројекта је припремљен предлог главног пројекта који се бави спровођењем стратегија урбане регенерације јавног простора у партнерским градовима кроз транснационални оквир који се заснива на партиципацији, управљању, јавно-приватном партнерству, као и инструментима за финансирање урбаног развоја. Додатно, пројекат CLEVER је омогућио идентификацију приоритетних подручја интервенције у партнерским градовима и аплицирање за доступне изворе финансирања у односу на предложене алтернативне сценарије главног пројекта.

CLEVER is a SMF Interreg project developed during the 2018/19 in consortium of three countries: Romania, Serbia and Croatia. The main aim of the project is to develop innovative models of urban governance in regeneration of public space by embracing the potential of new technologies. The main result of the project is preparation of the main project that enhances implementation of urban regeneration strategies for public space in partner cities through a transnational framework based on participation, governance, public-private partnerships, and urban development financing instruments. In addition, CLEVER project provided an opportunity to identify priority areas of intervention in partner cities, and apply for available funding sources in relation to the proposed alternative scenarios of the main project.
