Институција: Институт за архитектуру и урбанизам Србије – ИАУС

Пре израде урбанистичког пројекта спроведен је конкурс за идејно решење за реконструкцију спортског стрелишта „Царева ћуприја“ у Београду. Овај урбанистички пројекат, чији је саставни део првонаграђено решење, има за предмет архитектонско-урбанистичку реконструкцију комплекса стрелишта. Циљ реконструкције је да најтрофејнија спортска дисциплина Србије добије савремени национални тренажни центар у коме би се, осим редовних спортских и едукативних активности стрељаштва, одржавала регионална и државна првенства и међународни турнири. У оквиру комплекса планирани су објекат управе и објекат стрељане са припадајућим спортским тереном (пољем гађања). Обухваћени простор, површине око 2,5 ха, налази се у границама просторне културно-историјске целине „Топчидер“.

Before developing this urban design project, a competition was organized for the conceptual design for reconstruction of the shooting range “Careva Ćuprija” in Belgrade. This urban design project, containing the winning conceptual design, considers architectural and urban reconstruction of the shooting range complex. The main goal of this reconstruction is to provide a modern national training center for the most awarded sport in Serbia. Apart from recreational and educational shooting activities, regional, national and international tournaments will take place here. Shooting complex consists of administrative building and shooting range with shooting field. Location (~2,5 ha) is within the spatial cultural and historical entity “Topčider”.
