TOURISTIC COMPLEX – HOTEL AND APARTMENTS ON DANUBE

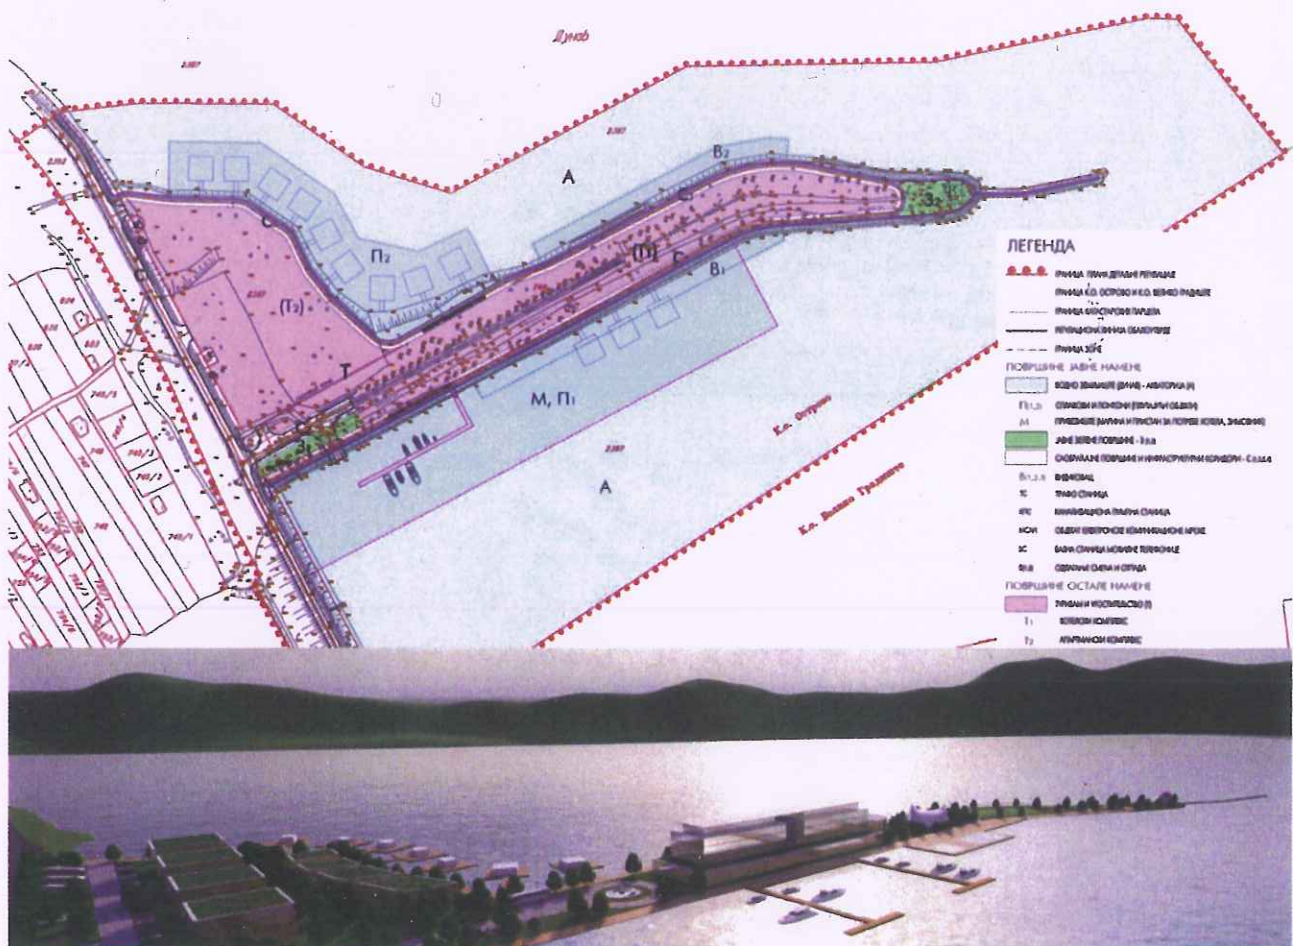

DETAILED URBAN PLAN WITH A CONCEPTUAL ARCHITECTURAL DESIGN

Detailed urban plan was developed for realization of touristic complex consisting of a 4-star hotel and luxury apartments with river marina on Danube's shore next to the Silver Lake. Complexity, shape, attractivity and visual perception of the location on the peak surrounded by the river, led to the proposed solution. Simultaneously with a planning process and urban design an architectural design was conceptualized in order to perceive all possibilities of spatial organization.

A detailed urban plan was developed for the realization of a touristic complex consisting of a 4-star hotel and luxury apartments with a river marina on the Danube's shore next to the Silver Lake. Complexity, shape, attractivity, and visual perception of the location on the narrow land peak surrounded by the river, led to the proposed solution. Simultaneously with the planning process and urban design, an architectural design was conceptualized in order to perceive all the possibilities of spatial organization. Special attention was given to public and semi-public areas, greenery and contact with the surrounding water. A circular pedestrian and cycling path with viewpoints connects parts of the complex and gives an opportunity to approach the outermost point. Besides the marina for boats, a water area is planned for leisure and sports activities, including floating platforms and a swimming pool. The architectural concept is light and translucent, adjusted to the location, its specific form and visual sensibility.
