## **Acknowledgements**

The current volume contains the peer-reviewed materials collected for the XXIX ISUF 2022 Conference. The Organisers are grateful to the Team of Reviewers and All Colleagues and Volunteers who contributed to the organisation and preparation of this event.

The abstracts and papers' collection and the review process were supported by the Ex Ordo Conference Management System.

## Task carried out from the state budget or from state purpose funds / Zadanie realizowane z budżetu państwa lub z państwowych funduszy celowych

Zadanie/Task: "Kongres International Seminar on Urban Form 2022"

Program/Programme: Doskonała Nauka

UMOWA/CONTRACT Nr DNK/SP/512952/2021

Koszty planowane ogółem/Total planned costs: 305 110 PLN

Koszty planowane do poniesienia ze środków finansowych przyznanych przez Ministra/Costs planned to be borne from funds allocated by the Minister: 125 980 PLN

Projekt zakłada organizację dwudziestej dziewiątej edycji dorocznego Kongresu International Seminar on Urban Form w Łodzi oraz w Krakowie. Corocznie, poczynając od 1994 roku, kongres gromadzi naukowców z całego świata zainteresowanych zagadnieniami związanymi z morfologią miasta. Dotychczasowe edycje Kongresu odbywały się w miastach europejskich, obu Ameryk, Azji oraz w Australii. Obecna edycja dotyczy pierwszego Kongresu w Europie Środkowo-Wschodniej. Proponowana tematyka dotyczy kwestii przekształceń struktury miejskiej i rewitalizacji w ujęciu multidyscyplinarnym. Tematyka kongresu wpisuje się w zakres zagadnień, które stanowią podstawowe wyzwania dla rozwoju przestrzennego Łodzi i Krakowa i innych miast polskich.

The project involves the organisation of the twenty-ninth edition of the annual International Seminar on Urban Form Congress in Łódź and Krakow. Every year since 1994, the congress has brought together scholars from all over the world interested in issues related to urban morphology. Past editions of the Congress took place in European cities, the Americas, Asia and Australia. The current edition marks the first Congress in Central and Eastern Europe. The proposed theme addresses issues of urban structure transformation and revitalisation in a multidisciplinary perspective. The themes of the congress are part of the range of issues that constitute fundamental challenges for the spatial development of Łódź and Kraków and other Polish cities.

# URBAN FORM, PLANS AND PROCEDURES: SOME RECENT TRANSFORMATIONS OF BELGRADE'S URBAN TISSUE

**Dr Ana Niković**

*Institute of Architecture and Urban and Spatial Planning of Serbia*

**Dr Božidar Manić**

*Institute of Architecture and Urban and Spatial Planning of Serbia*

## **Abstract**

This paper seeks to establish the relationship between the theory of urban morphology and the practice of urban conservation and urban planning. Spatial configurations of streets, blocks and other types of urban ensembles represent a heritage of a kind whether it is institutionally protected or its value is recognizable by experience or analysis. Good experiences of citizens' living and good traditions of city planning and building are ignored in contemporary urban planning practice in Belgrade, but also other Serbian towns. There, new planning approaches are applied which are based mainly on fulfilling the economic interest of private investors. The main issue is how to protect the space, how to ensure positive effects of future transformations which are supposed to meet the complex demands of contemporary life. In considering these, the recommendation from the international charters on the protection of urban heritage as well as good planning practices and urban morphology approach are discussed. An example of a postmodernist open residential block, incorporated in the urban tissue of individual housing, has been analyzed in terms of spatial and functional features of the block, procedures of planning, the content of planning documents, and its implementation. The recent transformations have been discussed that have been unfolded within a new planning framework and are mainly characterized as partial interventions which neglect the context and the initial plans which once have been developed for the whole block. Urban morphology can help in analyzing space qualities, creating scenarios for future development, and controlling planned transformations. The way of introducing the urban morphology approach depends on the capacity of the institutional and legal framework and it calls upon introducing new procedural instruments and steps: commission for check physical/morphological dimension of plans, handbooks for assessment the qualities of the location, etc.
